

WHAT MAKES RED MOUNTAIN SYRAH SO SPECIAL

- ◆ This is an extremely rare opportunity to purchase a very limited wine.
- ◆ Red Mountain is the preferred source of Syrah (Shiraz) in Washington State.
- ◆ It is one of the top areas for Syrah in North America.
- ◆ Last year's Limited Edition Red Mountain Cabernet Sauvignon was Cellar Craft's most successful Limited Edition to date and customers who are just starting to drink it are raving about it.
- ◆ This year's weather conditions were so perfect that the crop came in two weeks early. A winery was not ready to take the Sunset vineyard crop and so Cellar Craft was very lucky to purchase it. It's not likely you will ever get a chance at a kit like this again.
- ◆ The area's weather conditions should make this one a fabulous wine.
- ◆ Red Mountain is the smallest recognized geographically distinct grape growing area in the US.
- ◆ Only 2% of Red Mountain is planted with Syrah and Cellar Craft was able to secure 15% of the total crop.
- ◆ The crop is so small and US demand for it so high, you are not likely to find Red Mountain Syrah sold in Canadian liquor stores.
- ◆ This Syrah (Shiraz) will be more refined and elegant than an Australian Shiraz
